# Distribution EOLE - Tâche #26442

Scénario # 26383 (Terminé (Sprint)): Créer une instance Salt-Master/Clients pour la gestion des postes de travail

## Créer la recette salt permettant l'intégration au domaine automatisée des postes clients

14/01/2019 15:26 - Joël Cuissinat

| **Statut:** | Fermé | **Début:** | 14/01/2019 |
| **Priorité:** | Normal | **Echéance:** | |
| **Assigné à:** | Daniel Dehennin | **% réalisé:** | 100% |
| **Version cible:** | sprint 2019 2-4 Equipe MENSR | **Temps estimé:** | 0.00 heure |
| | | **Temps passé:** | 0.00 heure |

**Description**

Cf. base de code prévue pour la migration :
https://dev-eole.ac-dijon.fr/projects/eole-ad/repository/scribe-migration/revisions/master/entry/bin/migration_scribe#L157

NB : Pour éviter l'attente de 5 minutes pour que la machine redémarre, il ne faut pas mettre l'option restart=True mais enchaîner l'intégration avec une demande de redémarrage "instantanée" (ex : https://dev-eole.ac-dijon.fr/projects/scribe/wiki/ClientSalt#Red%C3%A9marrage-du-PC)

### Révisions associées

**Révision 24c01065 - 23/01/2019 15:30 - Daniel Dehennin**

Implement the Active Directory join formula

Ref: #26442

**Révision a33c64e6 - 23/01/2019 16:59 - Daniel Dehennin**

Install formula under /usr/share/eole/saltstack/salt/

Ref: #26442

**Révision 0c2d7f09 - 23/01/2019 17:09 - Daniel Dehennin**

Install “eole-workstation-formula”

Ref: #26442

**Révision 2842ad8d - 23/01/2019 17:11 - Daniel Dehennin**

Update packaging for EOLE 2.7.1 “Bionic”

Ref: #26442

**Révision f1a55a17 - 23/01/2019 17:19 - Daniel Dehennin**

Provide a static state top.sls

Do not put it under /usr/share/eole/workstation/ to avoid publishing
it over HTTP.

Ref: #26442

**Révision 7d51178c - 23/01/2019 17:29 - Daniel Dehennin**

There is no systemd service

- debian/rules: remove systemd related instructions.

Ref: #26442

**Révision 96480563 - 23/01/2019 17:58 - Daniel Dehennin**

The subdirectory was duplicated

Use the parent target directory.

Ref: #26442

**Révision 4020b498 - 24/01/2019 09:24 - Daniel Dehennin**

Dedicate the “eole-workstation.ad” to all Active Directory SLS

The “eole-workstation.join” SLS is now “eole-workstation.ad.join”

- README.rst: document changes.
- eole-workstation/ad/init.sls: include all Active Directory related SLS.
- eole-workstation/ad/join.sls: join workstations to an Active Directory.

Ref: #26442

**Révision ab0f9fb2 - 24/01/2019 09:27 - Daniel Dehennin**

Better name for the semaphore file to detect already joined domain

It's not a lock and the “domain” is an Active Directory domain.

- eole-workstation/ad/join.sls: the semaphore is now called “ad-domain-joined.sem”.
  The variable containing the semaphore file path is now “is_joined_sem”.

Ref: #26442

**Révision 94d19ff4 - 24/01/2019 10:05 - Daniel Dehennin**

Top “eole-workstation” SLS must refers “eole-workstation.ad”

- the “eole-workstation.join” is now “eole-workstation.ad.join”
- the “eole-workstation.ad” include “ “eole-workstation.ad.join”

Ref: #26442

**Révision 072c1692 - 24/01/2019 10:14 - Daniel Dehennin**

The needed reboot after join is not detected on version <= 2018.3.3

Add comments to explain why we need some states for “eole-workstation.ad.join”.

Ref: #26442

**Révision ecb5c456 - 24/01/2019 10:34 - Daniel Dehennin**

The rendering of SLS does not support unicode characters

Here are the errors on the windows machine:

```
Rendering SLS eole-workstation.ad.join failed, render error:
    'charmap' codec can't decode byte 0x9d in position 1455
```

- eole-workstation/ad/join.sls: remove unicode characters from comments.

Ref: #26442

**Révision 7fa64a44 - 24/01/2019 10:50 - Daniel Dehennin**

The “pillar.example” must specify all the configuration options

- pillar.example (eole-workstation.ad): add the Active Directory “domain”.

Ref: #26442

**Révision b6506e3a - 25/01/2019 09:53 - Daniel Dehennin**

The static state top.sls is provided by eole-workstation-manager

Move the state top.sls from eole-workstation-binaries to eole-workstation-manager.

Ref: #26442

**Révision 9e170fce - 25/01/2019 09:57 - Daniel Dehennin**

The static state top.sls is provided by eole-workstation-manager

Move the state top.sls from eole-workstation-binaries to
eole-workstation-manager.

This revert f1a55a17b099f78f8f372db9c56e991404d647e2

Ref: #26442

**Révision f81470ea - 25/01/2019 10:03 - Daniel Dehennin**

Replace eole-workstation-binaries for state top.sls

The SaltStack state top.sls is now provided by this package instead of
eole-workstation-binaries.

Ref: #26442
