Target version:	Sprint_2015_36-38 - Équipe MENESR	Estimated time:	6.00 hours
		Spent time:	6.25 hours

Description

J'ai erreur cette erreur dans cache.log :

```
(ntlm_smb_lm_auth) usage:
(ntlm_smb_lm_auth) [-b] [-f] [-d] [-l] domain\controller [domain\controller ...]
-b enables load-balancing among controllers
-f enables failover among controllers (DEPRECATED and always active)
-d enables debugging statements if DEBUG was defined at build-time.
```

```
You MUST specify at least one Domain Controller.
You can use either \ or / as separator between the domain name
and the controller name
```

Sauf erreur de ma part, le helper était patché dans les versions précédentes.
