Ce bug est toujours présent en 2.4.2

Cela fait suite à une mise à jour : creold plante, puis le VPN, puis ead-server et ead-web

C'est très pénalisant !

j'ai l'impression que j'ai eu le problème ce week-end sur notre zephir 2.5.2.

mise à jour ce week-end => reboot

au reboot plantage de creoled => pas de backend (entre autres ...)
