Description			
Bonjour,			
J'aimerais signaler un problème concernant le raccourcis vers la page d'administration de l'ead situé dans le répertoire personnel de l'admin, ce dernier pointe nulle part. (http://4200).

Fixes #1525

This mainly fixes the race conditions and other bugs in dynamic widget instantiation by adding a new API, `Nevow.Athena.Widget.addChildWidgetFromWidgetInfo`, which returns a `Deferred` which fires after the widget has been added to the widget hierarchy.

This also updates Mantissa, Quotient, and ClickChronicle to use this API rather than the non-deterministic mechanisms they were previously using.

This also unifies the various view selection criteria into a single object in the Quotient Mailbox code.
