Révisions associées

Révision bdc8dd60 - 07/02/2017 11:57 - Philippe Caseiro

Correction du template lxc.devices.hook

Le "current_container" n'a pas forcément de disknodes.
C'est ce qui fait planté CreoleLint ... il n'y a donc pas
de bug dans CreoleLint ...

ref #18676 @2h

Révision d04fc089 - 09/02/2017 10:50 - Daniel Dehennin

Protect access to containers attributes

Some container's attributes are not present, checking the length of such an attribute result in

```
"RuntimeError: maximum recursion depth exceeded while getting the repr of a tuple"
```

We need to protect access to such attributes, but the following does not work:

```
%if 'attributes' in %%current_container
```

we need to explicitly use "%%hasattr".

- `tmpl/lxc.config`: Protect access to "disknods".
- `tmpl/lxc.fstab`: Protect access to "fstabs".
- `tmpl/lxc.devices.hook`: Use single quote.

Ref: #18676

Révision 0127d8ef - 09/02/2017 16:05 - Daniel Dehennin

Template: check element existence in context with "in"

It's not possible to make:

```
%if 'fstabs' in %%current_container
```

Because the "CreoleGet" object does not implements the "`__contains__()`" method.

- `creole/template.py` (`CreoleGet.__contains__`): Check variable existence in context.

Ref: #18676

Révision 6e59d31d - 09/02/2017 16:06 - Daniel Dehennin

Fix protection of access to containers attributes

We need to protect access to such attributes, but they are not attributes of the object `%%current_context`.

`creole.template.CreoleGet` is fixed to make the use of `"in"` possible.

- `tmpl/lxc.config`: Check existence of `"disknods"` in `"%%current_container"`.
- `tmpl/lxc.devices.hook`: Check existence of `"disknods"` in `"%%current_container"`.
- `tmpl/lxc.fstab`: Check existence of `"fstabs"` in `"%%current_container"`.

Révision 4393e590 - 10/02/2017 09:47 - Daniel Dehennin

LXC: fix `"UnicodeEncodeError"` on `/etc/hosts` generation

Concatening an unicode with a non unicode can result in `"UnicodeEncodeError"`.

- `creole/funcs/get_etc_hosts.py` (`get_etc_hosts`): Add unicode to inlined strings.

Ref: #18676

Révision f02f5d37 - 10/02/2017 09:47 - Daniel Dehennin

LXC: fix comment on container interface

- `creole/funcs/get_etc_hosts.py` (`get_etc_hosts`): Remove plural form for single interface.

Ref: #18676

Révision c745d69b - 10/02/2017 09:48 - Daniel Dehennin

CreoleLint: LXC must contains resources

Some templates use `"%%current_container"` to access container resources like `"interfaces"`, `"disknods"`, `"hosts"`, `"fstabs"`...

Protecting access in template is useless because CreoleLint did not use the correct method to build container context.

- creole/lint/parsetemplate.py (Check_Template.__init__): Use "CreoleClient.get_container_info()".

Ref: #18676
