Pour tester

- Avec la futur ISO 2.7.0 α4
- Depuis une [Ubuntu server](#) :

```
apt -o Debug::pkgDepCache::AutoInstall=true install eole-scribe-all
```

#9 - 05/28/2018 11:36 AM - Daniel Dehennin

- % Done changed from 0 to 100

#10 - 05/30/2018 01:30 PM - Fabrice Barconnière

- Status changed from Résolu to En cours

- % Done changed from 100 to 90

VM utilisée : aca.eolebase-2.7.0a4-Daily

apt -o Debug::pkgDepCache::AutoInstall=true install eole-scribe-all :

```
Lecture des listes de paquets... Fait
Construction de l'arbre des dépendances
Lecture des informations d'état... Fait
Installing eole-annuaire-pkg as Dépend of eole-scribe-all
...
...
...
Installing eole-scribe-web as Dépend of eole-scribe
eole-scribe-web:amd64 Dépend on eole-roundcube:amd64 < none @un H > can't be satisfied!
Installing eole-scribehorus as Dépend of eole-scribe
Certains paquets ne peuvent être installés. Ceci peut signifier
que vous avez demandé l'impossible, ou bien, si vous utilisez
la distribution unstable, que certains paquets n'ont pas encore
été créés ou ne sont pas sortis d'Incoming.
L'information suivante devrait vous aider à résoudre la situation :

Les paquets suivants contiennent des dépendances non satisfaites :
eole-scribe-all : Dépend: eole-scribe-web-pkg mais ne sera pas installé
Dépend: eole-scribe-module mais ne sera pas installé
E: Impossible de corriger les problèmes, des paquets défectueux sont en mode « garder en l'état ».
```
