**Revision 34111713 - 07/23/2020 10:50 AM - Daniel Dehennin**

fix(salt): the minion config files should not be removed by clean

Using path without drive letter on windows interact badly with the "clean: True" option making the configuration files to always be removed.

<https://github.com/saltstack/salt/issues/47969#issuecomment-662884432>

- eole-workstation/osfamilymap.yaml: use backslash for windows systems.
- eole-workstation/salt/minion/config/dir.sls: prefix the config directory with the "%SystemDrive%" environment variable or it will interact badly with "clean: True".
