

Distribution EOLE - Tâche #34241

Scénario # 34240 (Terminé (Sprint)): traitement express MTES

la gestion des acl via l'ead3 ne fonctionne pas

02/06/2022 17:14 - Vincent Chavanon

- Fichier 2022-06-02 17_17_41-.png ajouté

Quand on se connecte à l'ead3 avec le compte eole, sur certains serveurs, on ne peut derouler l'arborescence du serveur en claiquant sur le "+" devant /home, et un carré rouge apparait en bas à gauche (cf. PJ)
le lancant salt-minion en mode debug via la commande /usr/bin/python3 /usr/bin/salt-minion -c /etc/ead3/salt -l debug, ceci remonte :

```
[INFO      ] User eole Executing command ead.acl_find with jid 20220602143409072310

```

Si on clique sur le dossier home, on voit bien ses acl.

#2 - 28/06/2022 14:02 - Emmanuel GARETTE

- Statut changé de Nouveau à À valider
- Assigné à mis à Emmanuel GARETTE
- % réalisé changé de 0 à 100

Je viens de backporter en 2.7.1.

#3 - 28/06/2022 14:48 - Vincent Chavanon

- Statut changé de À valider à Résolu

test OK sur des eole 2.7.2 qui rencontraient le soucis

#4 - 05/07/2022 15:02 - Philippe Carre

- Statut changé de Résolu à À valider

Malheureusement , pas tous !

J'ai encore au moins 2 serveurs (Seth 2.7.2), où eole-fichier-actions est à jour (2.7.2-12) et où le pb est tjrs là :

```
-----
[INFO     ] User ppsrl Executing command ead.acl_find with jid 20220705125433685596
[DEBUG    ] Command details {'fun': 'ead.acl_find', 'arg': ['/home', {'__kwarg__': True, 'maxdepth': 1, 'mindep

```

Attention , sur ces serveurs seul eole-fichier-actions est à jour (apt install ... sur test-eole, et pas un Maj-Auto) . Est ce qu'il faut mettre à jour d'autres paquets ?

#5 - 24/01/2023 17:40 - Philippe Carre

- Statut changé de À valider à Fermé
- Temps estimé mis à 0.00 h
- Restant à faire (heures) mis à 0.0

Même vérif sur le même serveur (7 mois après!) , le pb est réglé !!
LEs ACL s'affichent correctement , sur tous les dossiers.
