Description			
Bonjour,			
Nous avons découvert un nouveau symptôme suite à la mise à jour du client Salt: l'ouverture de session est anormalement longue est reste assez longtemps sur la phase " <b>Application des paramètres utilisateur</b> "			
Nous avons l'impression d'être revenu à l'époque du client Scribe.			
Dans l'attente de votre support.			
Cordialement

Bonjour,

Peux-tu nous fournir des logs (installMinion.log et eole\_script.log) ?

Est-ce que le problème de délai est systématique, ou uniquement une seule fois ?

J'attire ton attention sur les dernières maj windows semblent démarrer beaucoup de processus au boot....et ceci ne vient pas du Scribe....

cf.: <https://dev-eole.ac-dijon.fr/jenkins/job/2.8.1/job/test-etb1-scribe-joindomain-win10-2.8.1-amd64/346/consoleFull>

on voit : mise à jour Edge, OneDrive, Startup experience ...

Merci de fermer le ticket.

Cordialement.
