Ne pas désactiver le CDROM pour apt au premier démarrage

24/06/2012 01:13 - Daniel Dehennin

Statut:	Fermé	Début:	24/06/2012
Priorité:	Normal	Echéance:	
Assigné à:	Daniel Dehennin	% réalisé:	100%
Catégorie:		Temps estimé:	0.00 heure
Version cible:	2.3.5 Minimale	Temps passé:	0.00 heure
Distribution:	EOLE 2.3		

Description

À la fin de l'installation, le CDROM est [désactivé](#) si d'autres entrées sont actives dans /etc/apt/sources.list

Il faudrait :

- N'activer les dépôts réseaux (ceux d'ubuntu et les nôtres) que si le réseau fonctionne ;
- Ne pas désactiver le CDROM si aucun dépôt réseau n'est joignable.

Révision 3ea31654 - 25/06/2012 16:41 - Daniel Dehennin

Add EOLE 2.3 apt repository configuration

This configuration is enabled by defining the class corresponding to the development status of EOLE 2.3 distribution wanted:

```
classes=eole/2.3/apt/&lt;UPGRADE LEVEL&gt;
```

The EOLE 2.3 debian repository is managed by mini-dinstall, this requires stacking all the repositories on top of the previous level of upgrade.

The purpose of this configuration is to enable Ubuntu mirror and EOLE local mirrors only if network is functional and keeps the CDROM active in /etc/apt/sources.list otherwise.

- start.sh: New class management util class_shell_escape() to transform class name into valid file name.
- classes/eole/2.3/apt/preseed: Empty
- classes/eole/2.3/apt/early_script: Fetch hands-off hook for apt-setup as executable /usr/lib/apt-setup/generators/00hands-off.
- classes/eole/2.3/apt/apt-setup-hook.sh: Enable network mirror and local repositories if local repository key is downloadable.
- classes/eole/2.3/apt/stable/preseed: Empty.
- classes/eole/2.3/apt/stable/early_script: Register class for hands-off apt-setup hook.
- classes/eole/2.3/apt/stable/all.seed: Arch independent EOLE 2.3 apt sources.
- classes/eole/2.3/apt/stable/amd64.seed: Arch independent AMD64 EOLE 2.3 apt sources.
- classes/eole/2.3/apt/stable/i386.seed: Arch dependent i386 EOLE 2.3 apt sources.
- classes/eole/2.3/apt/stable/subclasses: Require eole/2.3/apt.
- classes/eole/2.3/apt/updates/preseed: Empty.

- classes/eole/2.3/apt/updates/early_script: Register class for hands-off apt-setup hook.
