

EOLE AD DC - Demande #37569

samba addc en erreur 2.10 (scribe-amonecole)

28/07/2026 14:41 - Ludwig Seys

Statut:	Classée sans suite	Début:	28/07/2026
Priorité:	Normal	Echéance:	
Assigné à:		% réalisé:	0%
Catégorie:		Temps estimé:	0.00 heure
Version cible:			
Description			
Après instance etb3.amonecole-2.10-avecimport, et aca.scribe-2.10-avecimport, puis Maj-Auto -C => samba-ad-dc est en erreur et ne démarre plus.			
il semblerait qu'apparmor bloque le démarrage des conteneurs (pas de droits) une mise à jours de sécu serait à l'origine ?			
retour sur scribe :

```

problème rencontré durant un test de migration 2.8.1 to 2.10

il semble que faire Maj-Auto -C provoque cette cascade d'erreur, et rend samba hors service

Historique

#1 - 17/08/2026 11:41 - Klaas TJEJBES

Est-il possible que cela soit lié à

<https://dev-eole.ac-dijon.fr/projects/eole-common/repository/revisions/de48445c1589af3528f459f4d9af42b4d747123a/diff>

?

#2 - 18/08/2026 10:51 - Ludwig Seys

C'est possible. Il existe un problème documenté entre LXCFS et les restrictions ptrace de Yama.

L'issue LXCFS [#636](#) rapporte notamment exactement le même type de message noyau :

```
ptrace attach of "..." was attempted by "/usr/bin/lxcfs /var/lib/lxcfs"
```

Un correctif a d'ailleurs été intégré à LXCFS pour tenir compte de la politique ptrace/Yama.

Ça semble donc être une piste sérieuse à vérifier, notamment avec la modification qui positionne kernel.yama.ptrace_scope=3.
