Description

Bonjour

Je suis en cours d'installation d'un premier SPHYNX 2.3 et d'un premier AMON 2.3 (en test) ; les 2 serveurs sont à jour.

Je suis en mode PKI et dispose un serveur ZEPHIR 2.3

Ma conf RVP est créé sur ARV (Certificat ajouté , ip publique renseignée , Configuration Ok) et envoyée sur Zephir.

Après active_rvp init , lors du lancement du service RVP sur l'AMON 2.3 , j'ai le message suivant sur SPHYNX :

```
tail -f /var/log/rsyslog/local/charon/charon.info.log

Jun 18 17:16:28 sphynx23 charon: 02[NET] received packet: from 82.127.37.152[500] to 194.167.91.212[500]
Jun 18 17:16:28 sphynx23 charon: 02[ENC] parsed IKE_SA_INIT request 0 [ SA KE No N(NATD_S_IP) N(NATD_D_IP) ]
Jun 18 17:16:28 sphynx23 charon: 02[IKE] no IKE config found for 194.167.91.212...82.127.37.152, sending NO_PROPOSAL_CHOSEN
Jun 18 17:16:28 sphynx23 charon: 02[ENC] generating IKE_SA_INIT response 0 [ N(NO_PROP) ]
Jun 18 17:16:28 sphynx23 charon: 02[NET] sending packet: from 194.167.91.212[500] to 82.127.37.152[500]
```

Coté Amon 23 j'ai :

```
Starting IKE charon daemon (strongSwan 5.0.1, Linux 2.6.32-47-eole, x86_64)
Jun 18 17:47:14 amon23 charon: 00[CFG] loaded 0 RADIUS server configurations

Jun 18 17:47:14 amon23 charon: 10[IKE] received NO_PROPOSAL_CHOSEN notify error
```

Mon tunnel est FAILED.

Avez vous une idée de ce qui me manque pour que cela fonctionne ?
Merci d'avance pour votre aide.

Note : les règles ERA proviennent d'un amon 2.2 opérationnel

Cordialement
