Description

Suite à ce message : <http://eole.orion.education.fr/listes/arc/scribe/2013-12/msg00323.html>
et sa solution ici : <http://eole.orion.education.fr/listes/arc/scribe/2014-01/msg00006.html>

nous avons eu le même problème sur d'autres serveurs en 2.3, à jour côté Eole.

Voici le traceback de l'ead-server

```

Revision fe38a742 - 01/20/2014 04:59 PM - Joël Cuissinat

Application du patch "baculaconfig.py.patch"

Fixes #7115 @15m

History

#1 - 01/20/2014 02:59 PM - Benjamin Bohard

- File *baculaconfig.py.patch* added

- Description updated

- Assigned To set to Joël Cuissinat

Dans le cas d'un support de sauvegarde non renseigné (support = None), la fonction `mount_bacula_support` provoque une exception utilisée par la commande `baculamount.py`.

Cette exception n'est pas gérée par l'ead.

On peut gérer cette exception en exécutant la fonction `test_bacula_support`, dans la fonction `_get_test_form`, dans un try, en attendant mieux (appel non bloquant ?)

#2 - 01/20/2014 04:05 PM - Benjamin Bohard
