Squid ne redémarre pas après la mise à jour Candidate Eole-2.2.2-03RC

06/29/2010 10:26 AM - samuel morin

Status:	Fermé	Start date:	06/29/2010
Priority:	Haut	Due date:	
Assigned To:	samuel morin	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	Mises à jour 2.2.2 - 03 Stable	Spent time:	1.00 hour
Distribution:			

Description

les options de ntlm_auth ont changés.

You MUST specify at least one Domain Controller.

You can use either \ or / as separator between the domain name and the controller name

```
2010/06/29 10:20:39| logfileOpen: opening log syslog:LOG_LOCAL7|LOG_INFO
```

```
(ntlm_auth): invalid option -- a
```

```
unknown option: -?. Exiting
```

```
(ntlm_auth) usage:
```

```
(ntlm_auth) [-b] [-f] [-d] [-l] domain\controller [domain\controller ...]
```

```
-b enables load-balancing among controllers
```

```
-f enables failover among controllers (DEPRECATED and always active)
```

```
-l changes behavior on domain controller failyures to last-ditch.
```

```
-d enables debugging statements if DEBUG was defined at build-time.
```

Si on enlève l'option "-a" squid redémarre...

History

#1 - 06/29/2010 10:55 AM - samuel morin

- Assigned To set to samuel morin

- Target version set to Mises à jour 2.2.2 - 04 RC

La nouvelle version de squid avait été mal compilée. Les patches ne s'étaient pas appliqué car le répertoire debian/patched n'était pas vide...

#2 - 06/29/2010 11:42 AM - samuel morin

- Target version changed from Mises à jour 2.2.2 - 04 RC to Mises à jour 2.2.2 - 03 Stable

#3 - 06/30/2010 02:47 PM - Joël Cuissinat

- Status changed from Nouveau to Résolu

- % Done changed from 0 to 100

Nouveau paquet candidat : squid 2.7.STABLE9-1eole2

#4 - 07/09/2010 09:39 AM - Joël Cuissinat

- Status changed from Résolu to Fermé
